JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

COLUMBIA UNIVERSITY IN THE CITY OF NEW YORK

Columbia University includes both a college and a university in the strict sense of the words. The college is Columbia College, founded in 1754 as King's College. The university consists of the Faculties of Law, Medicine, Philosophy, Political Science, Pure Science and Applied Science.

The point of contact between the college and the university is the senior year of the college, during which year students in the college pursue their studies, with the consent of the college faculty, under one or more of the faculties of the university.

Barnard College, a college for women, is financially a separate corporation; but, educationally, is a part of the system of Columbia University.

Teachers College, a professional school for teachers, is also, financially, a separate corporation; and also, educationally, a part of the system of Columbia University.

Each college and school is under the charge of its own Faculty, except that the Schools of Mines, Chemistry, Engineering and Architecture are all under the charge of the Faculty of Applied Science.

For the care and advancement of the general interests of the university educational system, as a whole, a Council has been established, which is representative of all the corporations concerned.

I. THE COLLEGES

Columbia College offers for men a course of four years, leading to the degree of Bachelor of Arts. Candidates for admission to the college must be at least fifteen years of age, and pass an examination on prescribed subjects, the particulars concerning which may be found in the annual Circular of Information.

Barnard College, founded in 1889, offers for women a course of four years, leading to the Degree of Bachelor of Arts. Candidates for admission to the college must be at least fifteen years of age, and pass an examination on prescribed subjects, the particulars concerning which may be found in the annual Circular of Information.

II. THE UNIVERSITY

In a technical sense, the Faculties of Law, Medicine, Philosophy, Political Science, Pure Science, and Applied Science, taken together constitute the university. These faculties offer advanced courses of study and investigation, respectively, in (a) private or municipal law, (b) medicine, (c) philosophy, philology and letters, (d) history, economics and public law, (e) mathematics and natural science, and (f) applied science. Courses of study under all of these faculties are open to members of the senior class in Columbia College. Certain courses under the non-professional faculties are open to women who have taken the first degree. These courses lead, through the Bachelor's degree, to the university degrees of Master of Arts and Doctor of Philosophy. The degree of Master of Laws is also conferred for advanced work in law done under the Faculties of Law and Political Science together.

III. THE PROFESSIONAL SCHOOLS

The Faculties of Law, Medicine and Applied Science, conduct respectively the professional schools of Law, Medicine, and Mines, Chemistry, Engineering

and Architecture, to which students are admitted as candidates for professional degrees on terms prescribed by the faculties concerned. The faculty of Teachers College conducts professional courses for teachers, that lead to a diploma of the university.

1. THE SCHOOL OF LAW, established in 1858, offers a course of three years, in the principles and practice of private and public law, leading to the degree of Bachelor of Laws.

2. THE COLLEGE OF PHYSICIANS AND SURGEONS, founded in 1807, offers a course of four years, in the principles and practice of medicine and surgery, leading to the degree of Doctor of Medicine.

3. THE SCHOOL OF MINES, established in 1864, offers courses of study, each of four years, leading to a professional degree, in mining engineering and in metallurgy.

4. THE SCHOOLS OF CHEMISTRY, ENGINEERING AND ARCHITECTURE, set off from the School of Mines in 1896, offer respectively, courses of study, each of four years, leading to an appropriate professional degree, in analytical and applied chemistry; in civil, sanitary, electrical, and mechanical engineering; and in architecture.

5. TEACHERS COLLEGE, founded in 1888 and chartered in 1889, was included in the University system in 1898. It offers the following courses of study: (a) graduate courses leading to the higher diploma or to the secondary diploma; (b) professional courses, each of two years, leading to diplomas for teachers and supervisors in kindergartens or elementary schools, or for specialists in Domestic Art, Domestic Science, Fine Arts, Music, and Manual Training; (c) a collegiate course of two years, which if followed by a two years' professional course, leads to the degree of Bachelor of Science. Certain of its courses may be taken without extra charge, by students of the university in partial fulfillment of the requirements for the degrees of Bachelor of Arts, Master of Arts and Doctor of Philosophy.

RECENTLY PUBLISHED

Johnston's High School History of the United States

With Maps, Plans and Illustrations. Being the author's "History of the United States for Schools," as revised and continued by Prof. WM. MACDONALD of Bowdoin.

xvii+612 pp., 12mo, \$1.25 net.

The present volume has been brought through the Spanish War to McKinley's second election in 1900 and materially enlarged. As far as practicable the late Prof. Johnston's text has been preserved, and great care has been taken to maintain in all new matter the characteristics and principles of his original book. Political matters and the account of the colonial period have been expanded. Each chapter has been supplied with topics for further study, and with a brief bibliography, supplemented by critical comments. Many of the maps have been taken over from the *Shorter History*, and nearly all the portraits are new. According to the report of the Committee on College Entrance Requirements of the National Educational Association which tabulates the returns from 64 colleges, "selected (a) to cover all sections of the country, (b) to include all types," 28 colleges specify text-books in United States History. Out of this number 20 colleges (including Harvard, Columbia, Princeton, Johns Hopkins, Massachusetts Institute of Technology, Vassar, and the State Universities of Michigan, Wisconsin, Iowa, Minnesota, Illinois, and Ohio) recommend "Johnston's History of the United States for Schools," and it is named *exclusively* four times as often as any other.

Gordy's Political Parties in the United States Vol. I, 1783-1809.

598 pp. 12mo. \$1.75, net special.

A thoroughly revised edition. Vol. I by itself is a well-rounded history of the Federal period.

To be completed in four volumes; the second is now in press.

Nation (on the first edition): "May be read not only by beginners, but by almost anybody with profit. It is written in a clear and simple style, and is entirely non-partisan."

McCracken's Rise of the Swiss Republic Second edition, revised and

enlarged. xi+423 pp. 8vo. \$3.00.

Prof. A. B. Hart, of Harvard: "This is the most convenient and serviceable book in English on Swiss history and development, and Americans have much to learn from the experience of our sister republic."

Kuhns's German and Swiss Settlements of Colonial Pennsylvania

A Study of the So-called Pennsylvania Dutch.

248 pp. 12mo. \$1.50.

Opening with a vivid account of the terrible sufferings following the Thirty Years' War, that caused some of these emigrants to leave their native land, the author describes the settling in Pennsylvania and the towns of heavy by sea and land in these days, the Pennsylvania German farmers, their language, literature, education, religious life, battles, etc.
